Play Therapy With Autism and Neurodevelopmental Disorders

**SOUTH DAKOTA EARLY
CHILDHOOD**

Mental Health Collaborative

Date: October 24, 2019

TIME: 9am

WHERE: SDSU Volstroff Ballroom

TRAINING PROVIDED BY INTERNATIONAL TRAINER: Dr. Robert Jason Grant
Ed.D, LPC, RPT-S, CAS

WHERE: SDSU Volstroff Ballroom

WHAT: Come explore how play therapy can be a viable and effective treatment for neurodevelopmental disorders! This training will focus on learning play therapy approaches and interventions that address the core struggle areas of children with autism, ADHD, and other neurodevelopmental disorders which include: social skill deficits, emotional regulation challenges, relationship development issues, concentration and focus issues, and anxiety struggles. Evidence supported play therapy approaches, assessment procedures, guidelines for implementing play therapy interventions, and several structured play therapy techniques will be highlighted. Several modalities including experiential participation, video examples, lecture, and case study illustrations will be presented

All are welcomed to attend, regardless of play therapy experience!
